

MaineHousing Carbon Market Project: Using carbon revenue to expand energy efficiency projects for low-income populations

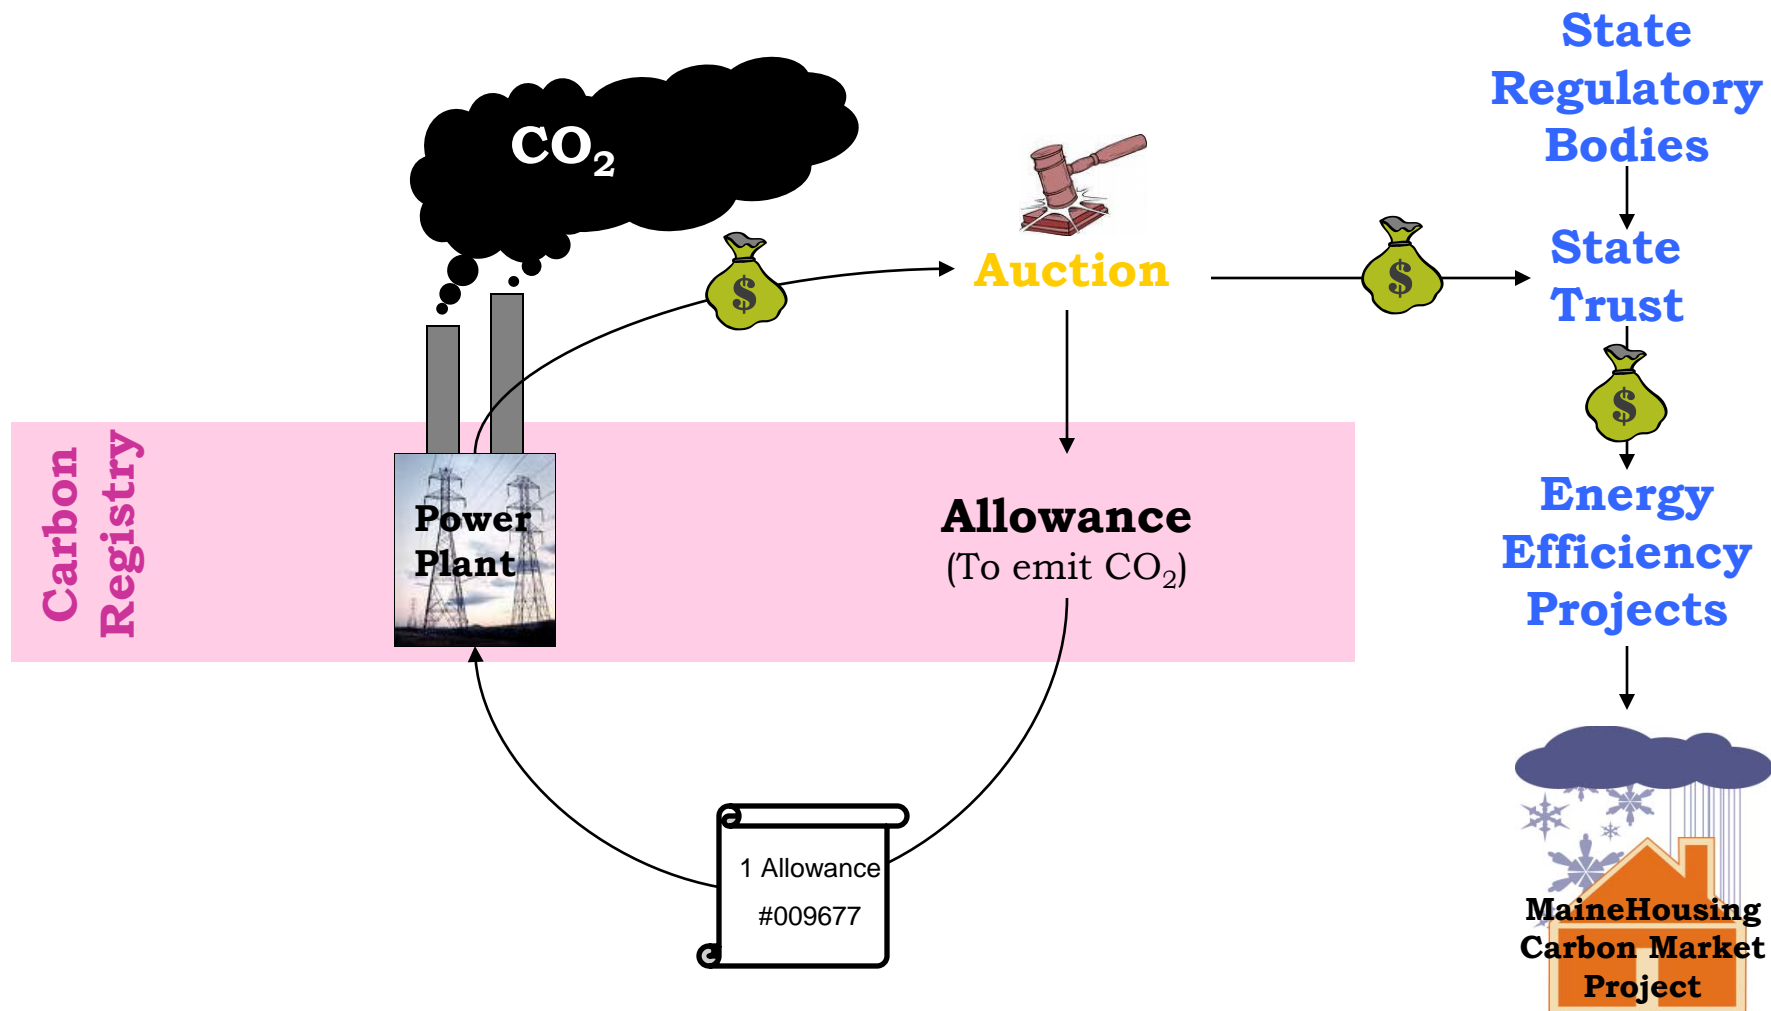

Regional Greenhouse Gas Initiatives: Every ton of carbon emitted must have a corresponding allowance, or offset.

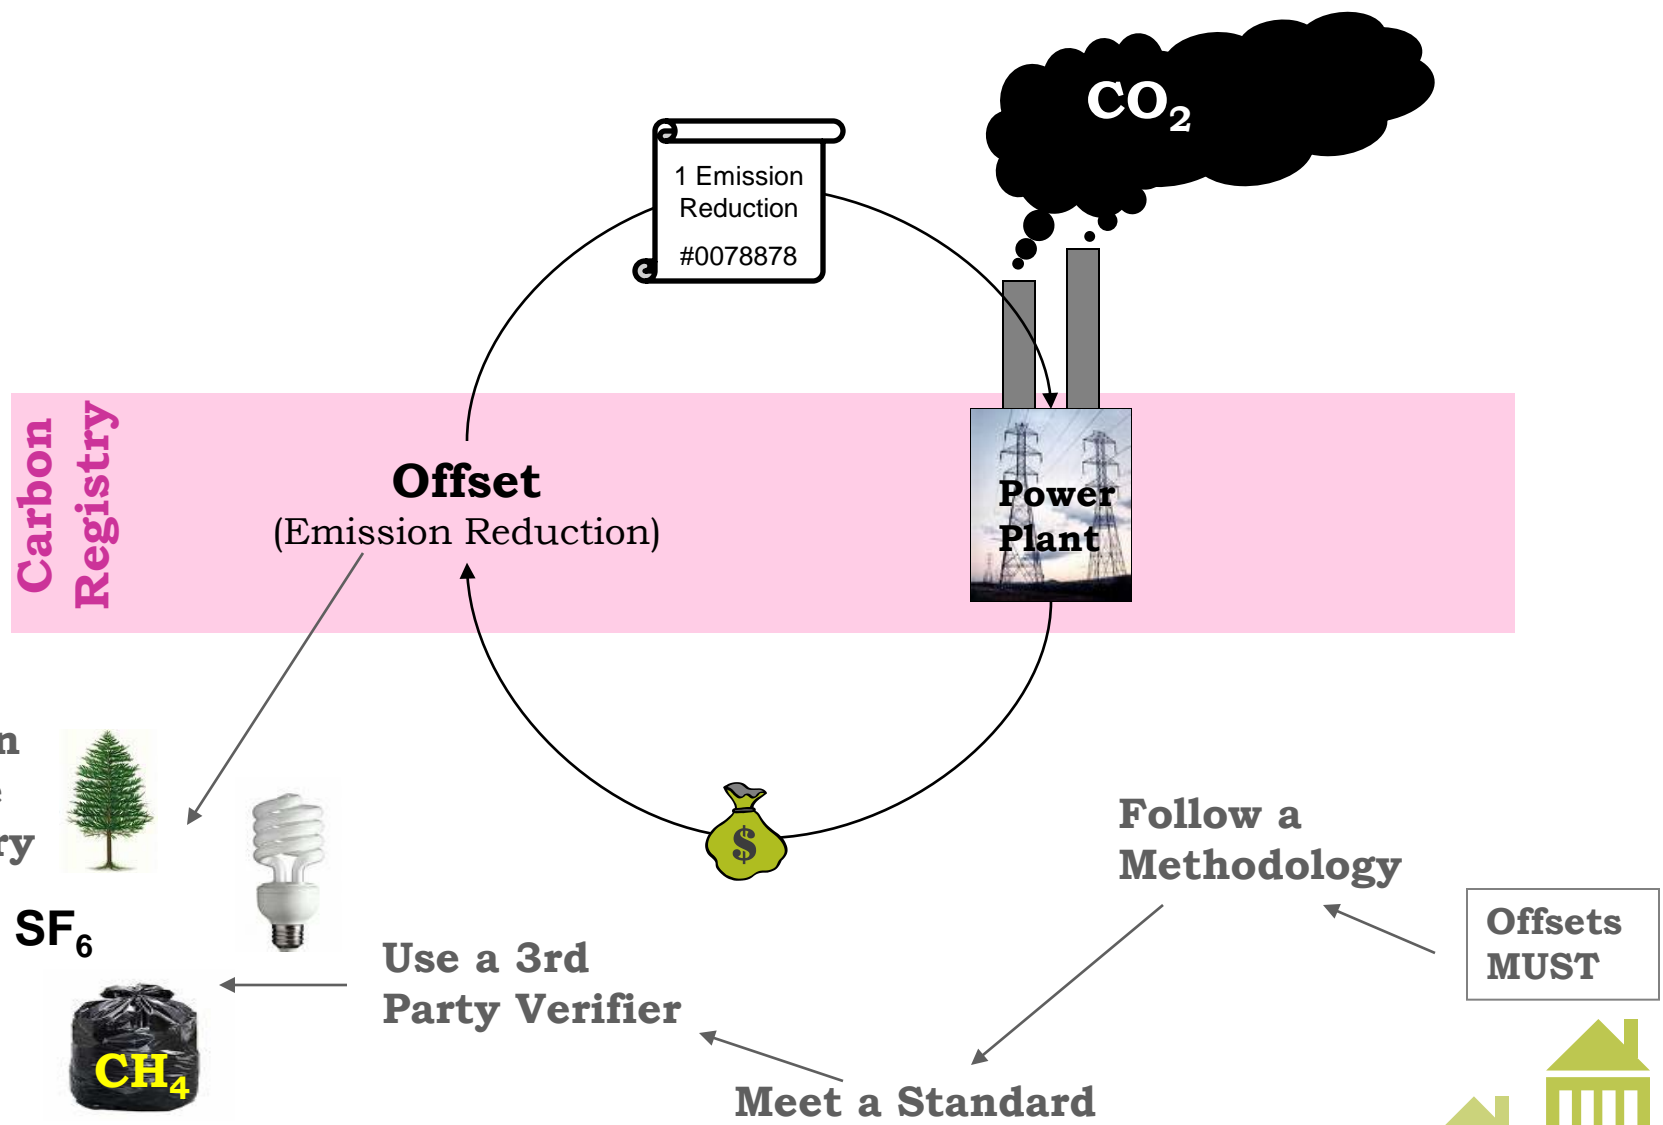

RGGI: A Cap-and-Trade Program

Auction proceeds finance energy efficiency projects

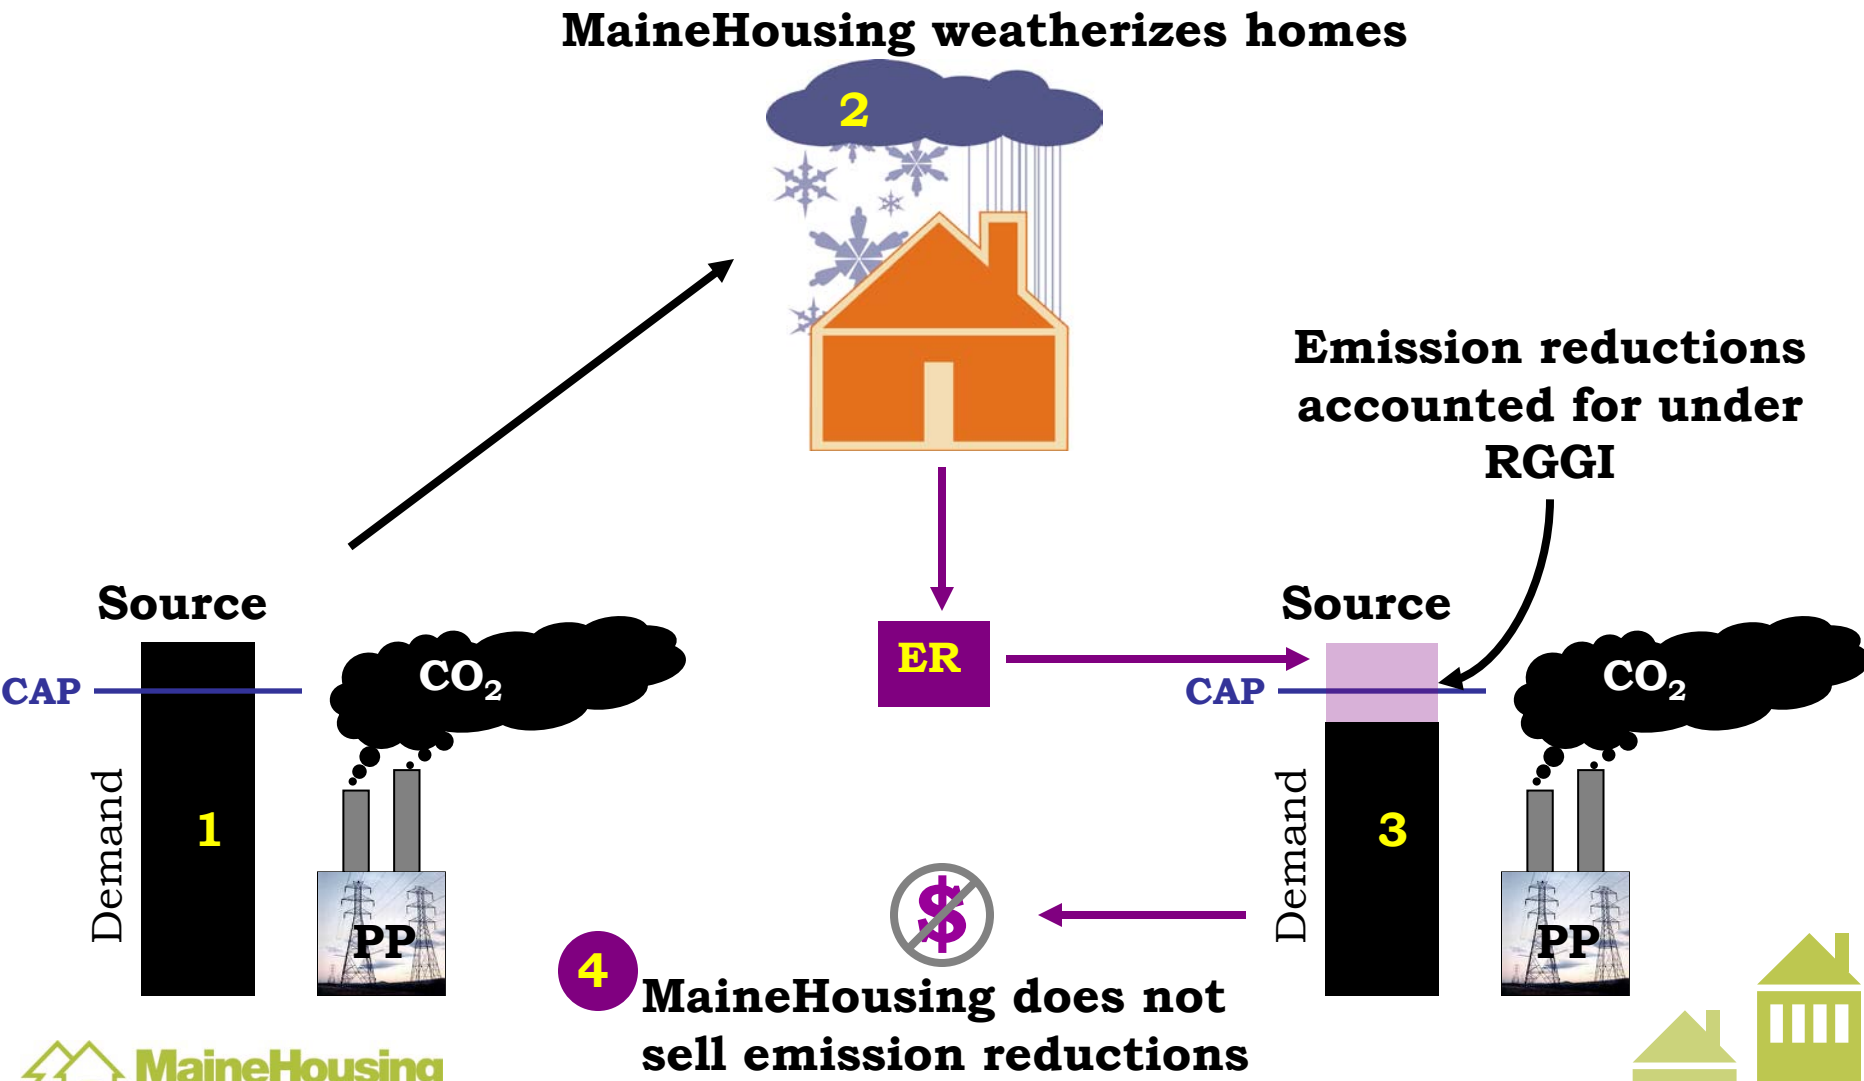

RGGI: A Cap-and-Trade Program

One offset equals one ton of carbon not emitted

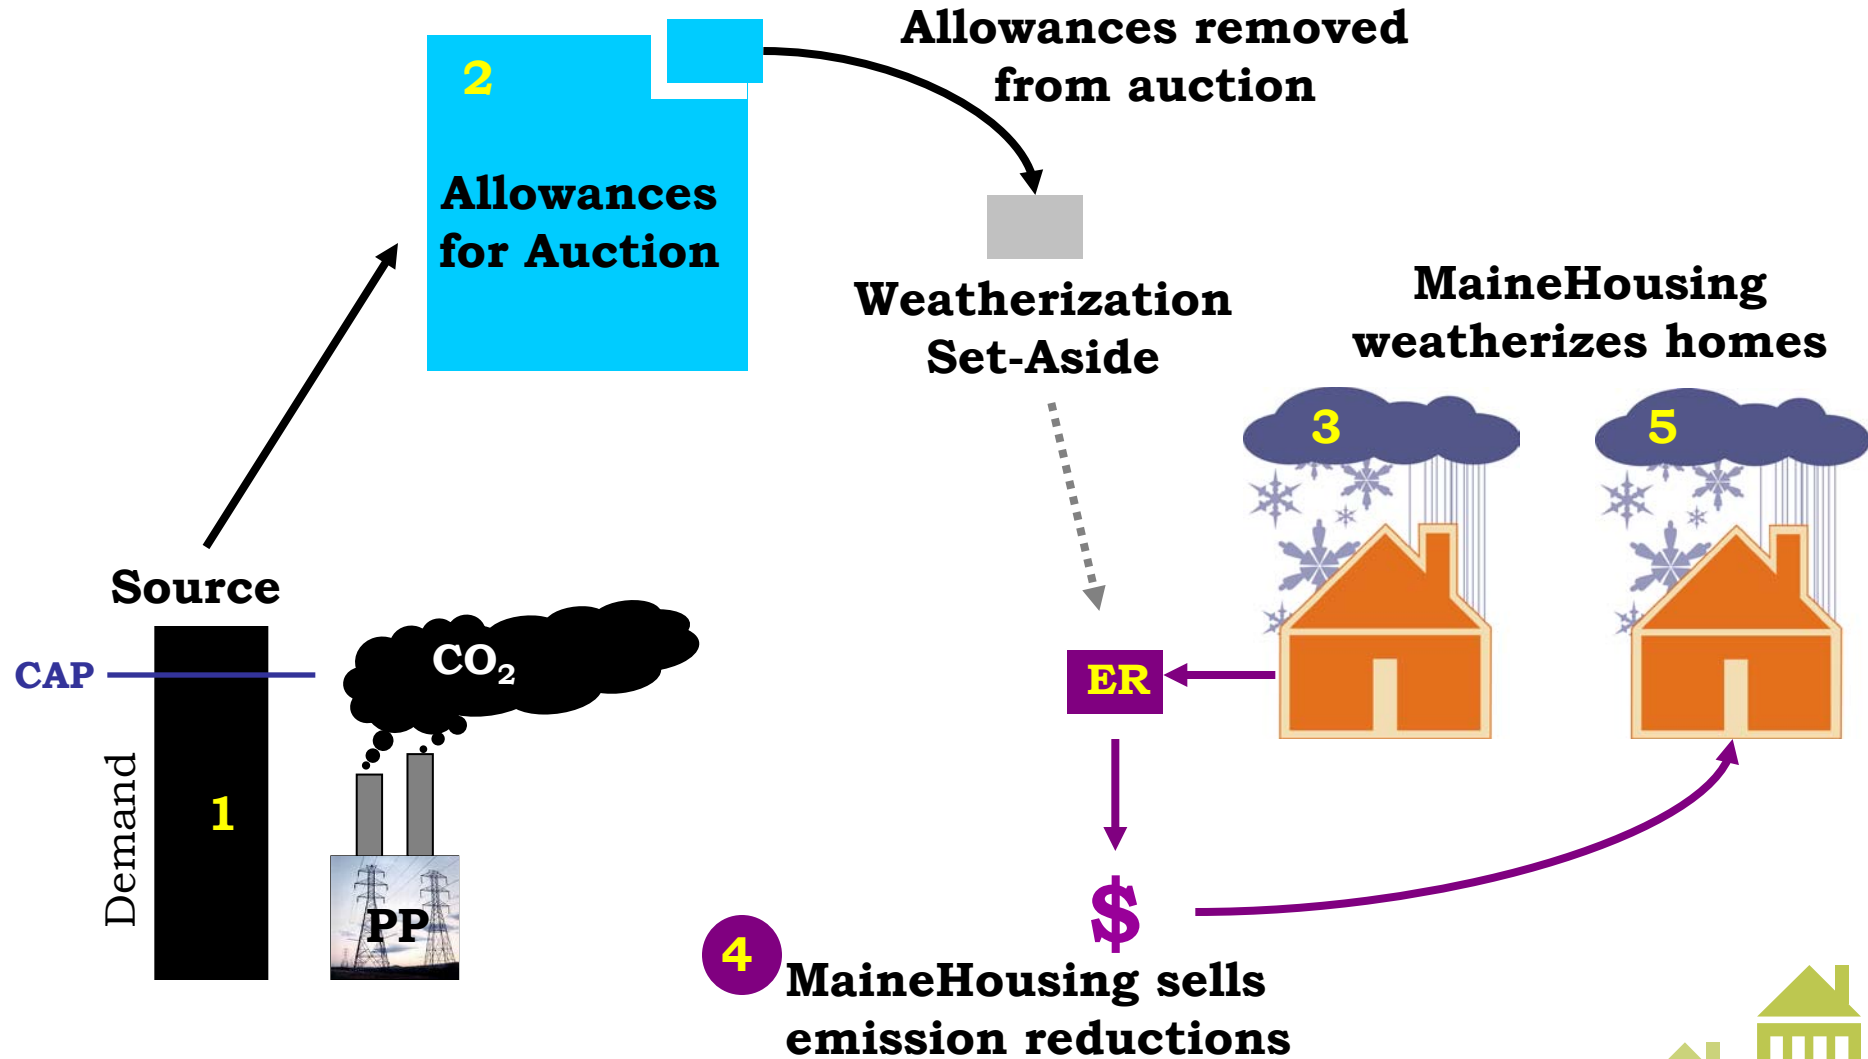

Avoiding Double Counting

Option A: We do not sell the electric emission reductions from weatherization.

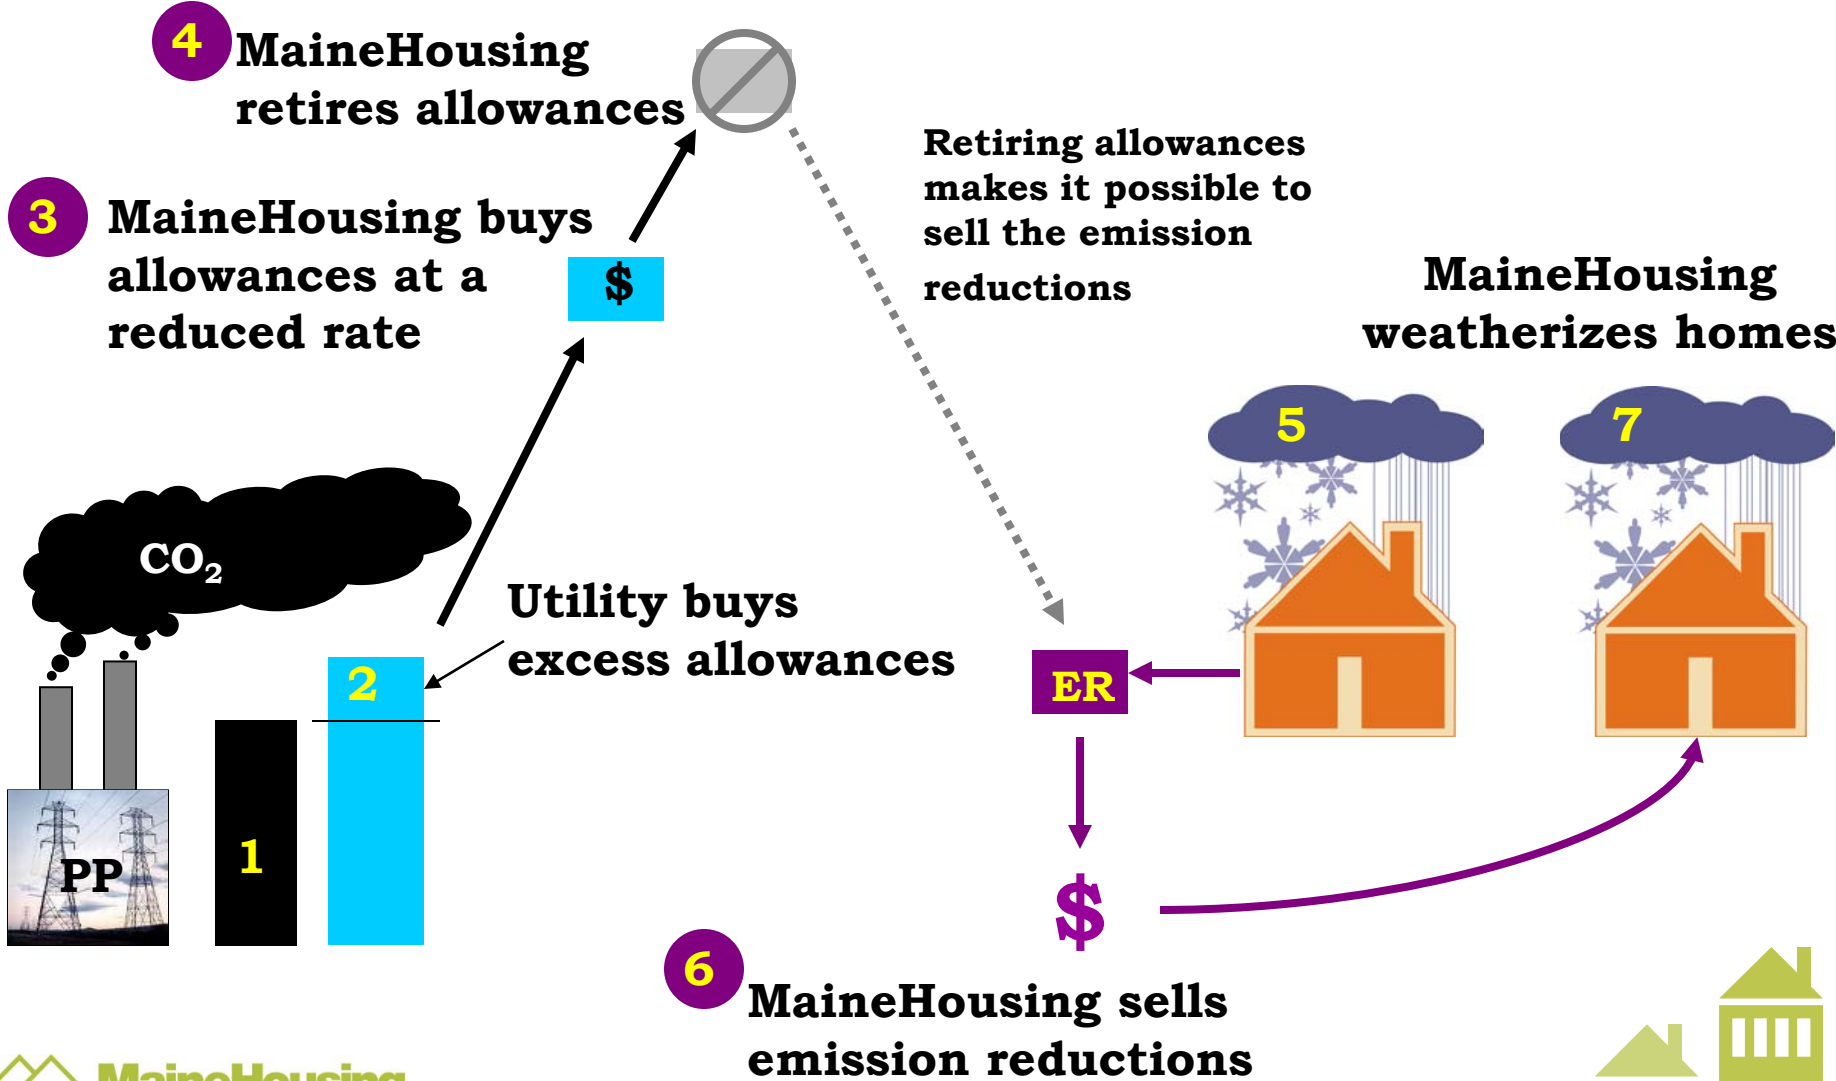

Avoiding Double Counting

Option B: We may sell the electric emission reductions from weatherization with a weatherization set-aside.

Avoiding Double Counting

Option C: We may sell the electric emission reductions from weatherization by buying and retiring excess allowances from a utility
